

Alltec Screens Folding Frame Screens

The Alltec Screens Folding Frame portable projection screen is specifically designed for large venue events, delivering larger-than-life presentations anytime and anywhere! The Folding Frame projection screen is ideal for large venues like trade shows, auditoriums, stages and even outdoors.

Design and Construction

The Alltec Screens Folding Frame projector screen is quick to set up and take down, assembling in just a few minutes without any tools (depending on the size). The Alltec Folding Frame utilizes a heavy-duty Aluminum frame design with folding hinges that latch together like an erector set and the fabric snaps onto the frame. The entire screen (frame and fabric) is neatly stored in a durable, wheeled carry case that can be easily transported in most vehicles or by plane.

The Alltec Folding Frame projector screen utilizes a heavy-duty Aluminum frame design with folding hinges and easy locking joints. Simple push buttons allow for easy height adjustment of the entire screen surface for larger applications, where additional height is needed. If being used outdoors, we recommend adequate additional restraints and weighting to be added to the base frame, with usage only during ideal non-windy weather conditions.

Key Features

- Alltec Folding Frame projector screens range from 110" to 200" diagonal sizes
- Fast and easy assembly, storage and transportation for ultimate convenience
- Heavy-duty, reinforced frame and legs for stability
- Easy locking joints with quick release mechanism and snap on tensioned fabric
- Perfect for 4K Ultra HD and HD Resolutions
- Hard wheeled transport and storage case included for travel
- 1" black border on all sides of the viewing surface to absorb excess light
- User-friendly height adjustable frame to give the optimum projection height by simply adjusting the button
- Available in HDTV (16:9) and NTSC Video (4:3) aspect ratios
- Matte white projection screen fabric with black backing, 1.1 gain and 110° viewing angle
- 1 year warranty

Matte White Fabric

Viewing Angle: 110° / Gain: 1.1

Matte White – The most versatile screen fabric surface and the premier choice when ambient light is controllable. The Matte White projector screen fabric evenly distributes light over a wide viewing area, while colors remain bright and life-like, with no shifts in hue or contrast. The 110° viewing angle allows for a wide audience seating arrangement. With a Gain of 1.1, this projector screen fabric increases some of the brightness from the projection source, as long as ambient light is controlled. A black backing to the fabric is also added to retain the projected brightness.

The matte white screen surface can be easily and safely cleaned with mild soap and water. Do not use any other stronger chemical cleaners, as this may negatively affect the projection surface. The fabric surface is also flame retardant and mildew resistant.

Specifications and Dimensions

Model Number	Diagonal	View Width	View Height	Case Size (LxWxH)	Package Size (LxWxH) & Weight	Frame Color	Aspect Ratio	Screen Material
ATS-FD110H	110	96	54		49.6 x 15 x 18.7 – 77lbs	Silver	16:9 HDTV	Matte White
