Hydra™ Multi-Head Cable - Plenum Rated

| VGA/UXGA - 15-pin HD

Kramer's new xl generation of Hydra CP-MH1/MH1 multi-headed cables offers the highest possible performance and the features most requested by installers and users. The Hydra MH1 configuration is ideal for any application requiring a cost-effective one piece cable solution for the signals most often found in AV equipped rooms today

FEATURES

Quality Construction - Hybrid construction using molded and back shell connectors is unique to Kramer

Plenum Rating - CP versions of MultiHead are constructed from CL2P and CMP rated cable containing six highresolution mini coaxes and 2 shielded pairs

Newly Updated - Slim connectors with shallow depth profile are top priority in the new XL generation. At the same time, aesthetics are even nicer than before, using elegant molded connectors at one end where it is typically connected to a projector, and an extra shallow 45º VGA connector with removable metal shells is used at the other end to provide all possible options for installation in tight quarters

Flexible Applications - Use the 15pin HD, 3.5mm stereo, and 3 RCAs for any combination of VGA, video and audio signals. The mini connector may also support remote control in some cases. The RCAs are typically used for composite video and L/R audio, but can be used for analog component video

Companion Wall Plate - Designed as the perfect fit with the WAV5 wall plate

Cable Specs - For detailed specs, see Kramer BCP6X2T bulk cable. Note that the 15pin HD portion only passes RGBHV so there is no ID/DDC support

Varied Selection of Lengths - Available in versions of 1.8 to 45.7m (6, 10, 15, 25, 35, 50, 75, 100, 125 and 150ft)
