**DESCRIPTION**

Our FL-600P Floor Boxes combine rugged construction and an elegant design for use in carpet, tile or covered/ uncoated concrete applications. This makes it the perfect floor box for ballrooms, convention spaces and high traffic areas. There is ample compartment room to accomodate power, audio, video, telecommunication, and data in one elegant and practical box.

There is a variety of covers to choose from. Options include integrated carpeted wedge, solid covers for non-carpeted, bare floor applications and different finishes. The lift-off section of the cover allows full access to internal connector plates and inserted cable. The hinged cover will drop flat to allow the cover to remain in place after connections are made and cables are routed through it. The .025" raised edge style covers are UL, scratch water approved.

The innovation continues to the "transformable" back box. The FL-600P"s internal brackets can be arranged to provide numerous options for both high and low voltage gang openings making it the most flexible and easiest to inst.

Our FL-600P floor boxes are UL Listed. All boxes are UL Listed. The 3", 4", 6", 8", and 10" deep boxes are UL listed.

The unit includes all the necessary internal plates and brackets to make "pre" and "post" pour compartment changes quick and easy. Using this system, both high and low voltage gang configurations along with compartment isolation can be implemented on the fly. This makes just about any cabling/ connector scenario possible.

**Pour Pan Accessory**

The FSR Pour Pan is the answer to floor box installations that are on grade. If your application is a poured concrete floor, the unit may not rest on sick, rock, gravel, etc., you must first install the Pour Pan. The Pour Pan is set into the grade below the floor box and allows concrete to flow around and under the unit to prevent the floor box from contacting the grade. The unit comes with extended length leveling feet, and the unique "pan wings" prevent the pan from shifting during the pour.

**Specifications**

- UL Listed - Includes Steel Construction Cover
- Covers - UL Scrub Water Rated - No Carpet Trim
- Back boxes - UL Listed - Includes Steel Construction Cover
- Covers - UL Scrub Water Rated for Tile and Carpet Installations
- 11-gauge steel temporary construction cover included
- 11-gauge finished steel cover with choice of carpet edging
- Mitered brass or aluminum carpet edging .25", high, for flat and solid covers available
- Stainless steel compression latches on models with carpet flanges, and solid covers
- Lift-off full access door • Leveling feet
- No Flange, Oak Sandtex
- 1/4" Aluminum Flange Painted Gray
- 1/4" Brass Flange
- Lift-off section of cover allows full access to internal connector plates and internal cables. The hinged wall door flaps back to allow the cover to remain in place after connections are made and cables are routed through it. The .25" raised inside style covers are UL scrub water approved.
- The innovation continues to the "transformable" back box. The FL-600P"s internal brackets can be arranged to provide numerous options for both high and low voltage standard gang openings making it the most compact and easiest to in- stall floor box available. Removable center dividers make passing cables through the various compartments a snap. Integrate "Easy Pour" leveling feet are standard on all of the back boxes. Several box depths are available. The 3", 4", 6", 8" and 10" deep boxes are UL listed.
- The unit includes all the necessary internal plates and brackets to make "low" and "post" your compartment changes quick and easy. Using this system, both high and low voltage gang configurations along with compartment isolation can be en- stalled "on the fly". This makes just about any cabling/ connector scenario possible.
