

1 Download the Solstice Client Software Zip Files

Visit www.mersive.com/get-solstice and download the two Solstice Client Software zip files to your computer.

2 Install Solstice Client Software on your USB drive

Plug your USB drive into the USB port of the computer you used to download the Solstice Client Software zip files.

Create three new directories (i.e. folders) on your USB drive, one entitled 'Mac', the second 'Windows 7-8-10' and the third 'Windows XP'.

On your computer, right click the Solstice Client Software zip file for Mac that you downloaded and select 'Extract files...'. Then browse to the Mac directory on your USB drive as the location to extract the files to and select 'OK'.

Repeat this process for the Windows Client Software zip files and directories.

3 Make Additional Dongles

Copy all contents of your Solstice USB Dongle onto additional USB drives as needed.
