

4K/UHD HDMI Over 100M HDBaseT TX/RX with Ethernet, Control, PoE, and Return Optical Audio

AT-UHD-EX-100CEA-KIT

The Atlona AT-UHD-EX-100CEA-KIT is an HDBaseTTM transmitter/receiver kit for HDMI transmission up to 328 feet (100 meters) over category cable with Ethernet pass through, RS-232 and IR control, Power over Ethernet, and optical audio from receiver to transmitter. This extender kit transmits video signals up to 4K/UHD @ 60Hz, 8-bit color, 4:2:0 chroma subsampling with embedded multi-channel audio and remote 48V power for the receiver. A digital audio pathway returning back across the HDBaseT link from a smart TV to an AVR routes multi-channel audio using TOSLINK optical connectors. Additionally, the kit extends Ethernet, RS-232, and 12 volt-based IR control commands. The kit is HDCP 2.2 compliant and supports EDID communication. Both transmitter and receiver feature one-third rack width metal enclosures for easy rack mounting with rear panel I/O ports for uncluttered wire management.

The AT-UHD-EX-100CEA-KIT is a premium HDBaseT extender pair for residential systems that require audio from the TV to be amplified by an AVR near the set top box located at some distance from the TV. Return audio may be any audio signal including Dolby or DTS up to 5.1 (based on limitations of optical audio standard). The kit utilizes HDBaseT technology specifically designed to support audio extension based on HDBaseT 2.0 compared with some other solutions which use HDBaseT control channels to transmit return audio which may cause latency or quality issues.

4K/UHD capability -

- Compatible with Ultra High Definition sources and displays
- Full support of 4K/UHD streaming services and playback devices

HDCP 2.2 compliant -

- Adheres to latest specification for High-bandwidth Content Protection
- Allows protected content stream to pass between devices

Receiver to transmitter digital audio pathway -

- Routes multi-channel audio from TV to AVR on same extender and cable as video from set top box to TV
- Eliminates extra cable needed to bring high quality audio from embedded TV apps

Ethernet, RS-232, and Bi-Directional IR -

- No additional control cables required
- Saves time and money during installation

Remote-powered receiver -

- Power for receiver is supplied by transmitter over HDBaseT; meets HDBaseT certification requirements
- Saves time and integration costs; ensures interoperability and safety requirements

Extended distance HDMI extension -

- Transmits HDMI signals up to 328 ft (100m) @ 1080P and 328 ft (100m) @ 4K/UHD using CAT6a/7 cable
- Uses easy-to-integrate category cable for low-cost, reliable system installation

4K/UHD HDMI Over 100M HDBaseT TX/RX with Ethernet, Control, PoE, and Return Optical Audio
