

C-FOHM/FOHM

Fiber Optic/HDMI Hybrid Cable

Kramer's all-HDMI cable system is constructed of high-performance hybrid cable containing fiber optic and copper wires terminated with HDMI connectors on each end. Transmitter and receiver modules are built in to the cable for sending HDMI signals long distances with pristine digital image quality.

*Note that an FOHM series cable is an active electronic product which, like any other, comes with a slight chance of needing removal or replacement in the future. Therefore, we suggest that these not be permanently fixed into installations as might be appropriate with an ordinary cable. If permanent install is required, please see our detachable equivalents such as the 670R/T.

FEATURES

- **Quality Construction** - Pristine digital transmission of HDMI signals at distances up to 100m (328ft); available in black jacket. Note: A FODM series cable is an active electronic product which, like any other, comes with a slight chance of needing removal or replacement in the future. Therefore, we suggest that these not be permanently fixed into installations as might be appropriate with an ordinary cable. If permanent installation is required, see our detachable equivalents such as the 631T/R.
- **High Resolution** - Compatible with all HDTV standards up to 1080p and all VESA resolutions up to WUXGA (1920x1200) at 60Hz refresh rate with 1 pixel/clock mode.
- **Flexible Power Options** - Uses +5V internal power supplied via the HDMI/DVI graphic source to power the transmitter and receiver or from the provided external +5V power adapter.
- **Varied Selection of Lengths** - Available in versions of 10, 15.2, 20, 30, 50, 100m (32.8 to 328ft).
