COVE® RJ

The Cove RJ is part of the ECA Retrofit product line which is designed to provide users an easy way to upgrade their power and data needs within many of the major manufacturer's furniture lines. The Cove RJ fits into a 2" x 6.75" opening which is commonly used by furniture manufacturers such as Herman Miller and Steelcase. The Cove RJ now provides you additional options to accommodate specific project needs without going through the hassle of specifying, managing or changing cutout sizes within your core furniture. Cove RJ is available in both corded and DaisyLink versions which allow multiple units to be connected from one power infeed. Options for USB, HDMI and data along with different finishes are also available.
