"The Murideo SIX-G is for the AV integration market to confirm HDMI 2.0 and HDCP 2.2 compliance at the 18 GBP/sec level. Additionally, the 6G is an excellent troubleshooting tool for distributed HDMI systems and a reference source for video calibration and is compatible with CalMAN."

18 GBPS 4K

Certified *isf* Pro Tool

Includes the only complete suite of ISF Test Patterns and lab grade reference output levels.

HDCP 2.2 verification ensures compatibility between components
