

GETAWAY™

## GETAWAY™ MOBILE MEETING TECHNOLOGY

The Getaway is a **portable, easy-to-use technology solution** that can easily convert any space into a collaborative meeting area. A combination of power receptacles and USB charging ports keep your favorite devices charged, even while in use. High definition HDMI audio visual components are packaged neatly inside the unit, and allow for up to 4 users to share ideas on one screen with the simple push of a **"Show Me"** button.

## THE GETAWAY PROVIDES:

- **Tamper resistant receptacles** which help keep foreign objects out, adding an additional level of safety.
- **Integral cable management** – HDMI cabling is stored inside the Getaway and concealed by a catch lid, while integral feet provide stability and double as power cord management.
- A **carrying case** makes transporting the Getaway from room to room a breeze, or place it on a mobile cart with a screen and be ready to meet, anywhere.
- A **reduction** in both technology and furniture **costs** by sharing Getaways among multiple meeting areas.
- **Easy set-up** – simply connect the Getaway to a power source and monitor, and you are ready to share.
