HM200-100

- ✓ Standard 12 inputs and 48 outputs
- ✓ Expandable to 20 inputs and 120 outputs
- ✓ Independent audio zone control
- ✓ Automatic configuration
- ✓ Easy to add additional displays
- ✓ Ready to work out of the box

The HM200-100 utilizes the latest technology developed by Altinex. The MultiTasker technology assures easy rack mounting installation and simple control capabilities. The Homerun technology provides seamless distribution of video signals over a low cost CAT6A network cable. Each video output can be extended to 100 meters (328 ft). The system provides 4 audio zone outputs and can be expanded to additional zones as needed. Zone configuration is simple and audio signals are fully synchronized with the video signals.

Signal type: HDTV 1080p/60

Number of inputs: 10 to 60

Number of outputs: 10 to 120

Number of audio zones: 1-12

Control: Touch panel, web interface, 3rd party

IP Switch: 1GBaseT or 10GBaseT

Total Latency: 300ms

Audio vs Video latency: 2ms

Compliance: HDMI, HDCP, FCC

Lead time: 4-8 weeks based on configuration
