Warnings

- Before the installation, disconnect the power supply from all the devices.
- Do not connect or disconnect cables from the Transmitter and Receiver while they are powered ON. To connect or disconnect cables from the units, power them OFF first.
- For best resolution and ESD performance, a shielded CAT6A in a TIA / EIA 568B wiring configuration is recommended. Please use care when installing, connecting and disconnecting cables.

1. Connect the source to the **HDMI IN** on the Transmitter.
2. Connect the IR emitter to the **IR OUT** and the IR Receiver to the **IR IN** on both the Transmitter and Receiver.
3. Connect a Display to the **HDMI OUT** on the Receiver.
4. Connect the **HDBT OUT** on the Transmitter to the **HDBT IN** on the Receiver via a shielded CAT5e / CAT6 / CAT6A / CAT7 cable. (CAT6A shielded cable is recommended for best performance.)
5. Connect the power supply.
