

Live Video Streaming

NHD-300 TX - H.264 Encoder

The NHD-300-TX is a powerful A/V encoder that allows streaming of 1080p HDMI content over a network. Standard protocols such as RTSP, RTMP, Unicast and Multicast, transmissions can be decoded by a broad range of 3rd-party hardware and software solutions.

Applications

- Distance Learning
- House of Worship
- Live Entertainment
- Video Broadcasting
- Gaming & eSports
- Corporate Training

Key Features

- Supports video content up to 1920x1080p @60Hz 8bit
- Supports audio sampling rates of 32Khz, 44.1Khz and 48Khz
- HDMI loop out for connection to a local monitor or secondary distribution system
- 3.5 mm input for secondary audio
- PoE
- H.264 network transmission supports configurable encoding rates between 16Kb/s~12Mb/s
- Multiple simultaneous encoded outputs using different stream formats
