

AVPro **edge** + sealoc

WEATHERPROOFED VIDEO DISTRIBUTION

Protecting delicate electronics with Sealoc's nano-coating solution creates a virtually invisible, durable, waterproofing protective layer that works specially with AVPro Edge's own computer boards and components. The nano-coating creates a tough barrier on circuitry that encapsulates the electronic components which protects against water, moisture, humidity, dust, salt-air and corrosion of various types.

- Non-flammable
- Anti-corrosive / Corrosion-preventing
- IP65 Protection
- Conformal coating thickness: 0.00011"
- Resists humidity, water, dust, salt-air, and many chemicals
- Makes electrical contact through the barrier coating
- Extremely flexible & vibration resistant
- ROHS and REACH compliant

Use AVPro Edge's Sealoc sealed extenders in these application:

- Outdoor projectors
- Outdoor televisions
- Areas with high humidity
- Dirty racks that are not checked on/or cleaned often
- Outdoor digital signage
- Areas prone to a lot of dust
- New construction where there is a lot of sheet rock and saw dust

Available Models with Sealoc Weatherproofing:

AC-EX70-444-RNE-SEA

AC-EX40-444-KIT-SEA

AC-MXNET-1G-D-SEA
