

AMX / FG1010-311

DXL-TX-4K60 Digital Media Switchers

The AMX DXLite transmitter allows for the distance transport of Ultra high resolution video, embedded audio, bidirectional RS-232 and IR and USB 2.0 over a single category cable. AMX DXLite supports 4K60 4:4:4, HDCP 2.2, and HDR video, providing compatibility with the latest source devices and displays when used with compatible receiving devices. Ideal for point-to-point solutions in conjunction with the DX-RX-4K60 to bring video and audio from the table to the display, and bring USB 2.0 signals from AMX Acendo video conferencing soundbar or other USB 2.0 based camera/speaker devices back to the table for use by visiting laptops. It is also ideal for use as a distance input into the DXLite inputs on the AMX Incite All-In-One Presentation Switcher for support of video signals up to 4K60 while receiving power from the Incite DXLite inputs.

- DXLite 4K60 4:4:4 HDBaseT Transmitter
- Experience pixel-for-pixel video reproduction of 4K60 source video with full 4:4:4 color space
- HDCP 2.2 support
- USB 2.0 distribution
